Continuation of Substance of Interview including description of the general nature of what was discussed: After considering the applicant's argument with regards to a separate thrust ring in the March 3, 2006 amendment the examiner agreed that if the noted claims made clear that the thrust ring was a separate member then the claims would be favorably considered. The examiner proposed changes to claims 1 and 18 which included references to a containment shell hub, thus making clear that the claimed thrust ring was a separate element. The applicant agreed to the changes as set forth in the attached Examiner's Amendment..
